DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 10-138243. JP-138243 discloses a rubber kneading machine comprising two horizontal rolls (3,4 / 56,57) disposed vertically close to each other through the intermediary of an adjusting device (62) for allowing the gap between an upper roll and a lower roll to be freely adjusted, rotative driving means for rotating the rolls, and a screw extruder (2 / 51) for supplying a rubber lump fed into a hopper (6 / 53) at a proximal end to the rolls, wherein a circulating mechanism for kneading and mixing rubber that is formed by feeding a rubber sheet the has left the rolls to the hopper is constructed of winding control means for selectively winding the rubber sheet onto the upper roll by differentiating the rotational speeds of the upper and lower rolls (see [0016]) by a variable speed motor of a decelerator and a conveyor (12) for sending the rubber sheet coming off the upper roll to the hopper. The screw extruder comprises two tapered screws (7 / 54,55).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
